Feedback on your performance is printed below. The report lists the objectives for which you answered a question incorrectly.

- Recognize the effect of an exception arising at a specified point in a code fragment. Note that the exception may be a runtime exception, a checked exception, or an error.
- Recognize the states in which a thread can exist, and identify ways in which a thread can transition from one state to another.
- Write code that correctly applies the appropriate operators including assignment operators (limited to: =, +=, -=), arithmetic operators (limited to: +, -, *, /, %, ++, --), relational operators (limited to: <, <=, >, >=, ==, !=), the instanceof operator, logical operators (limited to: &, |, ^, !, &&, ||), and the conditional operator (? :), to produce a desired result. Write code that determines the equality of two objects or two primitives.
- Write code to define, instantiate, and start new threads using both java.lang.Thread and java.lang.Runnable.

If this is the final exam in your certification path, you are required to complete the following steps to ensure delivery of your Certification Success Kit.
